

Dartmouth Symposium on Fluorine Chemistry

in celebration of the careers of
Professors David M. Lemal and Russell P. Hughes

Saturday May 28, 2016

Hanover Inn at Dartmouth, Hanover, NH

Karl O. Christe, University of Southern California, USA
“Never Say No to a Challenge: A Lifelong Pursuit of Impossible Chemistry”

Thomas Lectka, Johns Hopkins University, USA
“Generation of a Symmetrical Fluoronium Ion in Solution: Mechanistic Studies and Applications”

David O’Hagan, University of St. Andrews, UK
“Stereo-electronic Properties of Some Novel Organofluorine Motifs”

Steven H. Strauss, Colorado State University, USA
“The Flexibility of Fluorine: From Weak Donors to Strong Acceptors”

Free and open to the public; registration required at:

<http://chemistry.dartmouth.edu>

We thank *The Camille & Henry Dreyfus Foundation* for their support.
